

SYNTHETIC BOWLING SOLUTIONS

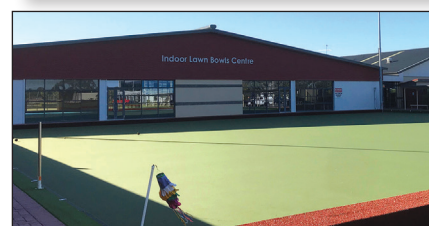

Mandurah Bowling Club

Mark from Synthetic Bowling Solutions came to our rescue last September (2018), to help fix up our greens.

The work they did on the three greens exceeded our expectations, especially with the re-use of our carpet. He put a dividing wall on the green and this has now enabled us to have two separate greens and allows us to replace one carpet at a time as we need. This is to the delight of all bowlers and the attraction of new bowlers to the club.

I can highly recommend Mark and his team as they were very informative of the process throughout from start to finish and were available to answer any questions from the members. We would highly recommend Synthetic Bowling Solutions for any and all Green Repairs and Replacement.

Aled Williams – President.

Comet Bay Bowling Club

The Comet Bay Bowling Club in Singleton WA wish to thank Mark Johnson and his team from Synthetic Bowling Solutions for the work carried on its new Green in February through March this year. Mark kept the management committee and Club members fully informed of problems encountered with our original base and fully explained any additional costs involved. He and his team were well organised, and all work was carried out in a professional manner. The new Green is settling in very well and will only get better with continued use over time. Comet bay would recommend Mark and his team at Synthetic Bowling Solutions to any Bowling Club needing new Greens or work done on their existing Greens.

Ron Arnold – President

Rockingham Bowling Club

After seeing what was achieved at Mandurah Bowls Club and Comet Bay Bowls Club we contacted Mark Johnson from Synthetic Bowling Solutions to discuss our needs to see what could be done to renovate our B Green polymer base and replace our Carpet within a tight budget. Once a schedule of all the works and a budget was in place Rockingham Bowls Club members were able to assist in the process alongside Mark and his team to achieve savings that allowed us to further revitalise our Club and get our members back playing on a first rate Pennants Green. Marks team went above and beyond with our Club and all thoroughly enjoyed the experience.

We would recommend Mark and his team to anyone wanting a first rate Green built or repaired at their Club.

Watson Mcilveen – B Green Project Manager.

SYNTHETIC BOWLING SOLUTIONS are a dedicated Bowling Green company specializing in the construction, rectification, and rehabilitation of Bowling Greens all over Australia and New Zealand. Based in Western Australia we understand the harsh conditions Australia's climate can produce and with the backup of a dedicated and experienced manufacturing and development group, we continue to evolve and supply the latest materials and expertise to meet our client's requirements.

As the licenced distributor in Australia and New Zealand of World Bowls approved Woven Carpets from the original manufacturer of GREENGAUGE products we have access to a range of products both Indoor and Outdoor and a range of colours to suit.

We can also supply and install Worlds Bowls approved Sandfilled products from APT and Fieldturf, two of the largest manufacturers of sports fields in the world.

We specialise in the upgrade and improvement of non-stabilised bases using an Advanced Polymer Bond system and can convert and upgrade every base type installed. Our services include full construction capabilities incorporating all aspects of design and construction from planning and excavation through to finished surrounds and include:

- Full client consultation and design.
- Woven and Sandfilled Synthetics
- Base and plinth repairs.
- Drainage and sprinkler systems.
- Lighting and fencing.
- Insurance and Maintenance services
- Funding and Grant application support.
- Full and partial roof and shade cover options.

We can price all or part of the works required and are well versed in working in with Clients and Clubs that need to contribute to the process to save costs to reach goals that may not be achievable otherwise.

We have a list of projects all over WA, New Zealand, which can be seen on our website. Personal contacts can be supplied on request.

Care and Maintenance

Synthetic Bowling Solutions supply all the latest algae and mould treatments as well as cleaning, conditioning and uv protectant chemicals specifically designed to treat and maintain your surface and warranties. We can assess your Green and provide maintenance and care schedules and packages to suit.
